Felix Miron

Senior Software Developer | Automation, Systems Integration & Data

Montréal, Québec | miron.felix.84@gmail.com

PROFILE

Software developer with over ten years of experience designing, developing and modernizing enterprise applications. Background in process automation, systems integration, API development and data analysis tools.

Expertise in C#/.NET, SQL and React/TypeScript, spanning distributed systems, software architecture and application modernization. Experience coordinating technical projects and mentoring developers, with a focus on reliability, maintainability and user needs.

TECHNICAL SKILLS

Automation & Integration: Automation scripts, REST APIs, WebSocket, systems integration, development and deployment automation

Data: SQL, SQL Server, PostgreSQL, Entity Framework, reporting, data analysis, query optimization

Languages: C#, TypeScript, JavaScript, Python, SQL

Back-end / Front-end: .NET, ASP.NET Core, Node.js / React, TypeScript, HTML, CSS

Cloud & DevOps: Azure, Docker, CI/CD, Git

Platforms: Dynamics 365, Microsoft Power Platform

Architecture & Leadership: Software architecture, distributed systems, technical coordination, code reviews, developer mentoring

Applied AI: Experimentation with AI models for software development

PROFESSIONAL EXPERIENCE

Lead Developer

Lightspeed Commerce - Montréal, QC | 2021-Present

- Automated development and deployment processes for internal applications.
- Designed and maintained REST APIs supporting data exchange across enterprise systems.
- Developed internal applications used by multiple operational teams.
- Built back-end services in C#/.NET and front-end interfaces with React/TypeScript.
- Contributed to architectural decisions and the gradual modernization of existing applications.
- Provided technical guidance and mentoring to less experienced developers.

PROFESSIONAL EXPERIENCE - CONTINUED

Software Developer / Technical Lead

City of Montréal - Montréal, QC | 2017-2021

- Analyzed and optimized SQL queries and application services to resolve performance issues.
- Worked with users and managers to assess requirements and design solutions using C#, .NET and SQL Server.
- Developed and maintained applications used by multiple municipal departments.
- Coordinated technical projects involving developers and external vendors.
- Modernized components of existing applications.

.NET Developer

CGI - Montréal, QC | 2014-2017

- Developed integration services connecting applications with client systems.
- Maintained and enhanced SQL Server databases.
- Developed web and Windows applications in C#.
- Implemented features in Microsoft Dynamics CRM.
- Contributed to technical analysis, effort estimates and code reviews.

Junior Developer

Desjardins - Montréal, QC | 2012-2014

- Developed automation scripts.
- Created reports and data analysis tools.
- Developed and maintained internal applications.
- Resolved defects and provided user support.

PERSONAL PROJECT

Compile Through Time

Experimental Software Compilation Platform | 2024-Present

Designed a platform exploring the experience of compiling a program across different computing eras.

- Integrated external tools and executed compilation processes.
- Designed a Node.js/TypeScript architecture.
- Developed REST APIs and WebSocket communication.
- Built a React interface.
- Experimented with AI models applied to software development.

EDUCATION

Bachelor’s Degree in Software Engineering - UQAM | 2012

Coursework in software design, algorithms, databases, distributed systems, applied mathematics and technology project management.
